SUMMARY

Frontend Developer with 1+ years of hands-on experience developing responsive, scalable, and high-performance web applications using React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, and Material-UI. Experienced in building reusable components, implementing responsive and mobile-first UI/UX, managing application state with Redux Toolkit, and integrating RESTful APIs for seamless client-server communication. Strong knowledge of modern frontend development, asynchronous JavaScript, API integration, data fetching, authentication, routing, and performance optimization. Experienced with GSAP for interactive animations and Vite for modern frontend development and build optimization. Proficient in Git and GitHub, with practical experience working with Node.js, Express.js, and MongoDB for full-stack application integration. Strong problem-solving and debugging abilities with a focus on clean code, component architecture, maintainability, scalability, accessibility, and web performance. Seeking a Frontend Developer or Full-Stack Developer position to build scalable web applications, develop high-quality user interfaces, integrate backend services, and contribute effectively to modern software development teams.

SKILLS

Languages

HTML5, CSS3, JavaScript (ES6+), TypeScript

Frontend

React.js, Next.js, Tailwind , Responsive Design

State & APIs

Redux, Context API, REST APIs, Axios, Fetch API

Authentication

JWT, OAuth 2.0, Google OAuth

Tools

Git, GitHub, npm, Vite, VS Code, Chrome DevTools

Performance

SEO, Lazy Loading, Lighthouse

PROJECTS

Hemma – Freelance Web Project 🔗

Hemma is a full-stack freelance web application featuring JWT-based authentication and Google OAuth with 2 authentication methods. The project integrates Cloudinary for image upload and media management and RESTful APIs for frontend-backend communication. I developed reusable responsive UI components, protected routes, and secure authentication flows using JWT and HttpOnly cookies.

Velora – E-commerce Web Application 🔗

Developed a responsive e-commerce web application using React.js, JavaScript, and Tailwind CSS, building **15+ reusable components** and **5+ responsive sections** across desktop, tablet, and mobile devices. Implemented GSAP animations and interactive UI elements, improving user engagement and creating a smooth shopping experience. Applied mobile-first development, component-based architecture, and performance optimization to deliver a scalable and maintainable frontend application.

Estate-Hub 🔗

EstateHub is a responsive static real estate website built with HTML, Tailwind CSS, and Next.js. Developed a responsive interface with reusable UI sections, smooth interactions, and mobile-first layouts, focusing on performance, usability, and user experience.

EDUCATION

Tanta University

Faculty of Computers and Information Bachelor's Degree in Computer Science
2025 – Present (Secend-Year)

09/2025 – 06/2029
